

Front-End Developer

Yordanos Agafari

Front-End Developer and Hyper Island student who builds modern, responsive web applications with React and Next.js. Focused on clean UI, accessibility, and well-tested code, with hands-on experience integrating front-ends with Node.js APIs. Comfortable working in Agile teams through code reviews and sprint planning, and eager to keep growing through real-world projects.

Ways of working: Agile / Scrum, manual testing & QA

Selected projects

VoiceForHer — full-stack React/Node platform raising awareness about abuse.

Portfolio — personal site showcasing front-end and UI work.

Languages

English (Fluent) · Swedish (Basic)
Amharic (Native) ·

Experience

Gaddr

Full-Stack Developer Intern

Dec 2025 – Apr 2026

Tech: React, Next.js, TypeScript, Node.js, REST APIs, Git, Agile/Scrum

Build and maintain front-end features in React and Next.js, integrating them with Node.js APIs and backend data. Work day-to-day in a cross-functional Agile team, taking part in sprint planning, daily stand-ups, and code reviews, and pairing with other developers to ship features. Run manual testing and QA to ensure feature quality before release.

Kuraztech

Web Developer Intern

2024

Tech: MySQL, HTML, CSS, JavaScript, Git

Supported backend development on real client projects and collaborated closely with a team of developers, contributing through shared version control and regular check-ins. Helped ship and maintain features as part of a coordinated team effort.

Freelance

Front-End Web Developer

2023 – 2024

Tech: JavaScript, React, HTML5, CSS3, responsive design, Figma

Delivered front-end focused solutions for clients, working directly with them to gather requirements and iterate on designs. Emphasized clean UI design, responsive layouts, and cross-device usability while keeping clients aligned throughout each project.
